

HUMAN CAPITAL OF VIA-MARINA

Via Marina's four current partners have complementary backgrounds that ensure optimal development of the SubmaRiver® system and the SubmaFlex® flexible pipe:

Founding Partner and Chief Executive Officer

Félix BOGLIOLO, a graduate of the École Polytechnique of Paris and a Doctor of Economics, is an expert in strategy and finance and the author of articles, books, and conferences.

Inspired by his personal story, he designed the SubmaRiver system and the SubmaFlex pipe; then founded Via Marina, ensuring and financing its commercial development, with more than 25 projects under discussion worldwide, notably in Chile.

Partner and Chief Scientific Officer

Gilbert MAYOR de MONTRICHER, a graduate of the École Polytechnique of Paris, is a renowned mathematician with extensive experience as an expert in pipeline sizing for the oil sector. He has taught for many years at prestigious American universities.

For Via Marina, Gilbert brings his advanced analytical expertise to the theoretical design of its innovative SubmaRiver system and SubmaFlex pipe.

Partner and Chief Technical Officer

Francis MEERT, a chemical engineer, has worked extensively in the textile industry on spinning, weaving, and assembly technologies, collaborating with various world-renowned textile machinery manufacturers.

He brings to Via Marina his in-depth knowledge of the industry's key players, the materials used in the SubmaFlex pipe, as well as their implementation techniques, and the design, manufacturing, and operation of the tooling required for its manufacture.

Partner and Chief Operating Officer

François THIÉBAUD, a civil engineer, has spent his entire career in offshore engineering and construction. He has directly contributed to the development of new technologies for the installation of pipelines at very great depths for offshore oil and gas. He has also participated in and managed very large projects.

He brings to Via Marina his experience in defining and implementing its technical development strategy and in carrying out its projects.
